ABOUT US

Aura-Chart is an AI medical scribe built around the real workflows of practicing clinicians. Instead of forcing providers to adapt to rigid software, Aura-Chart is designed to fit seamlessly into the way each clinic already works.

PROBLEM

- **Overwhelming documentation load** that eats into family and patient time.
- **Inefficient workflows** across audio recordings, faxed notes, and EMR entry.
- **Burnout** caused by repetitive, manual charting, and admin tasks.

SOLUTION

Aura-Chart automates charting using specialty-trained AI that is faster, more precise, and more customizable than traditional medical dictation tools.

- Generates clean, **structured SOAP** notes aligned with clinical workflows at a **high clinical accuracy**.
- Uses a context engine **500+ built-in templates** to eliminate hallucinations and ensure consistent medical language.
- Allows clinicians to **add context, edit sections, or generate notes** in parts for maximum flexibility.
- Designed around real-world usage by **pediatricians, family physicians, internal medicine** and more.
- Offers **industry-leading value** — premium AI at a fraction of the cost of competitors.

“WHY CLINICS CHOOSE AURA-CHART”

Precision

Minimal hallucinations due to clinical templates + context window

Simplicity

A clean, intuitive workflow designed for real practitioners - no training required.

Flexibility

Works with your charting style, not the other way around.

Price

Premium AI note-generation at a fraction of the industry standard.

Reduce Documentation Time by **70%** with Aura-Chart
